

FAQs:

Q: Does it the review process if I only select “plenary” instead of “plenary” and “concurrent”?

A: No, the selection committee will not see what you have chosen; your proposal will be reviewed based on its merits. This information will only be visible if your proposal is not selected, and we need to know whether it should be considered for another type of session.

Q: If I select multiple categories, will my proposal be viewed later or earlier than someone who only selects one?

A: No, all proposals available for a single type of session will be considered by the selection committee at the same time irrespective of what you choose. What you select will not change how or when it is reviewed.

Q: What happens when proposals are selected or not selected for any option chosen?

A: Proposal submitters will be notified by the stated date of notification. That date is the same for all proposals regardless of category.
